Project Name	Doyon Native Community Forest Project
Registry	American Carbon Registry
Registry ID	592

Applicable Vintage	2020
Project Description	The Anew - Doyon Native Community Forest Project is located on 172,737 acres of boreal forest across Alaska’s Yukon-Koyukuk and Southeast Fairbanks boroughs, and is the property of Doyon, Ltd, a for-profit corporation owned and managed by Alaska Native shareholders. Forests in the project region have been subject to mining and timbering, which still occur on Doyon lands today. The project supports Doyon’s mission to be a leading innovator amongst Alaska’s Native Corporations and to promote the economic and social well-being of Alaska Natives. Carbon funding will contribute to job opportunities and regional economic growth within the community, investment in sustainability infrastructure (e.g. clean water distribution stations, LEED building construction, restoration of riparian zones), and targeted forest management for cultural use and recreation. The financial success of the carbon project will reduce economic pressures for expansion of mining across Doyon’s broader land base.
