

DISCLAIMER: The voluntary carbon market disclosures below are made pursuant to California Assembly Bill (AB) 1305, Part 10 of Division 26 of the Health and Safety Code (passed 2023-10-07) as amended from time to time, also known as the Voluntary Carbon Market Disclosures Act (VCMDA). The VCMDA requires certain disclosures from business marketing and selling carbon offsets in California. These disclosures indicate BMO’s relevant disclosures under Section 44475.

BMO is an intermediary and not the credit developer or project owner for the below described project. Therefore, BMO does not generate or manage the below provided data or information and cannot guarantee its accuracy. Rather, BMO relies on the relevant voluntary carbon registry and the data or information provided to that registry by the project owners, developers, and verifiers to comply with the VCMDA disclosures.

The information provided below is current as of November 28th, 2024.

California’s Voluntary Carbon Market Disclosures Business Regulation Act (AB 1305)(“VCMDA”)

Project Name	11.35 MW BUNDLED RENEWABLE ENERGY BASED POWER GENERATION BY INTEROCEAN GROUP
Registry	Gold Standard
Registry ID	4446
Registry Link	https://registry.goldstandard.org/projects/details/1351
Applicable Vintage	2017-2019
Project Description	The project activity has been undertaken to harness the available wind/solar power potential to generate clean power Madhya Pradesh, Maharashtra and Karnataka. The project activity will install and operate 5 number of sophisticated, state-of art Wind Turbine Generators (WTG) consisting of 3*2000kW, 1*1500kW and 1*850kW with installed capacity of 8.35 MW and 3MW solar PV based power generation project with aggregated installed capacity of bundle as 11.35 MW. The project will generate approximately 21234MWh of electricity per annum, which will be sold to state electricity board of Madhya Pradesh, Maharashtra and Karnataka states of India. The WTGs in state of Madhya Pradesh and Maharashtra are connected to NEWNE regional grid and 3 MW solar PV in Karnataka State is connected to Southern regional grid of India. The project activity will displace approximately 4599MWh from Southern Grid and 16635MWh from NEWNE grid. The project activity will help in green house gas (GHG) emission reduction by using renewable resources (wind energy) for generating power which otherwise would have been generated using grid mix power plants, which is dominated by fossil fuel based thermal power plants.
Protocol	AMS-I.D. Grid connected renewable electricity generation
Project Location	India
Project Timeline (BMO interprets this as the full crediting period of the project)	Sep 26, 2014 — Aug 31, 2031
Project Start Date	09/26/2014
Emissions Reduction Dates & Quantities Issued	The Emission Reduction Dates & Quantities Issued can be found on the registry’s site for this Project: [https://registry.goldstandard.org/projects/details/1351]
Project Type	Solar Thermal - Electricity

Emissions Type	Avoided emissions
Standards Met	Project vintage meets the standard of Gold Standard's Project Protocol AMS-I.D. Grid connected renewable electricity generation as evidenced by registry listing and third party verification reports provided by the Gold Standard Registry site here [https://registry.goldstandard.org/projects/details/1351]
Durability	More information about durability can be found on Gold Standard's website here [https://assurance-platform.goldstandard.org/project-documents/GS4446]
Third Party Verifier	Earthood Services Private Limited
Volume of emissions removed or reduced annually	20,766 [https://registry.goldstandard.org/projects/details/1351]
Reversal Measures	More information about reversal measures can be found on Gold Standard's website here: [https://assurance-platform.goldstandard.org/project-documents/GS4446]
Source Data and calculation methods to reproduce / verify emissions reduction or removal credits issued	Refer to project documentation uploaded to the Registry. [https://assurance-platform.goldstandard.org/project-documents/GS4446]
