

DISCLAIMER: The voluntary carbon market disclosures below are made pursuant to California Assembly Bill (AB) 1305, Part 10 of Division 26 of the Health and Safety Code (passed 2023-10-07) as amended from time to time, also known as the Voluntary Carbon Market Disclosures Act (VCMDA). The VCMDA requires certain disclosures from business marketing and selling carbon offsets in California. These disclosures indicate BMO's relevant disclosures under Section 44475.

BMO is an intermediary and not the credit developer or project owner for the below described project. Therefore, BMO does not generate or manage the below provided data or information and cannot guarantee its accuracy. Rather, BMO relies on the relevant voluntary carbon registry and the data or information provided to that registry by the project owners, developers, and verifiers to comply with the VCMDA disclosures.

The information provided below is current as of November 25th, 2024.

California's Voluntary Carbon Market Disclosures Business Regulation Act (AB 1305)(“VCMDA”)

Project Name	Cordillera Azul National Park REDD Project
Registry	Verra Registry
Registry ID	985
Registry Link	https://registry.verra.org/app/projectDetail/VCS/985
Applicable Vintage	2016
Project Description	The Cordillera Azul National Park REDD+ Project avoids deforestation in a magnificent expanse of lowland and montane forests in four departments in central Peru: San Martín, Ucayali, Huánuco, and Loreto. The area encompasses 1,351,964 hectares inside the national park. The park, owned by the government of Peru, is managed and financed by the Peruvian NGO Centro de Conservación, Investigación y Manejo de Áreas Naturales (CIMA) through a public-private partnership piloted by the Peruvian government. The project's avoided-deforestation objective is accomplished by strengthening park protection, engaging local communities and other stakeholders in land-use management compatible with conservation, and improving the quality of life of the park's neighbors. Approximately 180,000 people in more than 200 communities – immigrant and indigenous – neighbor the park. Villagers close to the park mostly practice subsistence agriculture; those closer to major roads engage in market activities as well. CIMA and its close advisor, The Field Museum in Chicago, have worked with communities since 2002 to ensure that the project activities incorporate and reflect the values and aspirations of local residents. The project activities are highly participatory, with villagers leading several efforts and developing competencies that will enable long-term success. The biodiversity in the project area is astounding. Intact forests stretch from lowlands (150 meters) to ragged mountain peaks (2,400 meters). This eastern outlier of the Andes has been isolated sufficiently long for speciation to occur: more than 35 species new to science have been discovered in the park to date. The forests harbor rare and endangered species, as well as abundant populations of animals and plants that are crucial to the well-being of park neighbors.
Protocol	VM0007: REDD+ Methodology Framework (REDD+MF)
Project Location	San Martin, Ucayali, Huanuco, and Loreto, Peru

Project Timeline (BMO interprets this as the full crediting period of the project)	08/08/2008 - 07/08/2028
Project Start Date	August 8, 2008
Emissions Reduction Dates & Quantities Issued	The Emission Reduction Dates & Quantities Issued can be found on the registry's site for this Project: [Project Description]
Project Type	REDD+
Emissions Type	Reduced emissions
Standards Met	Project vintage meets the standard of VM0007 as evidenced by registry listing and third party verification reports provided by Verra's site here [Verra Project Summary]
Durability	More information about durability can be found on Verra's website here: [Project Description]
Third Party Verifier	SCS Global Services
Volume of emissions removed or reduced annually	1,575,268 Tonnes [Verra Project Summary]
Reversal Measures	More information about reversal measures can be found on Verra's website here: [Project Description]
Source Data and calculation methods to reproduce / verify emissions reduction or removal credits issued	Refer to project documentation uploaded to the Registry. https://registry.verra.org/app/projectDetail/VCS/985
