Project Name	Southern Cardamom REDD+ Project
Registry	Verra Registry
Registry ID	1748
Registry Link	<a href="https://registry.verra.org/app/projectDetail/VCS/1748">https://registry.verra.org/app/projectDetail/VCS/1748</a>
Applicable Vintage	2016
Project Description	The Southern Cardamom REDD+ Project (SCR P) is an initiative designed to promote climate change mitigation and adaptation, maintain biodiversity and create alternative livelihoods under the United Nations scheme of Reducing Emissions from Deforestation and forest Degradation (REDD+). The 445,339 ha SCR P encompasses parts of Southern Cardamom National Park and Tatai Wildlife Sanctuary and will protect a critical part of the Cardamom Mountains Rainforest Ecoregion – one of the 200 most important locations for biodiversity conservation on the planet. The Project will directly support the livelihoods of 21 villages in nine communes around the perimeter of the project area. Eight additional villages in 4 communes are eligible to receive educational scholarship. These communities represent approximately 3,957 families and 16,495 individuals. The Project’s climate benefits include the avoided emission of approximately 12 million t CO <sub>2</sub> e during this first monitoring period and over 115,000 million t CO <sub>2</sub> e over the lifetime of the Project. The Project will generate substantial community and biodiversity co-benefits. New and sustainable livelihood opportunities, such as direct employment, alternative income generating activities (IGAs) and initiatives to stimulate investment in businesses will be designed to reduce pressure on the environment while significantly increasing community well-being. Additional programs will address food security, improve health and education facilities, as well as raise environmental awareness. Biodiversity co-benefits will be achieved through greater protection of the ecosystem predominantly by means of increased security and improved monitoring. The Project will also be protecting critical habitat for significant populations of many IUCN listed species, including Asian elephant, Asiatic black bear, sun bear, large spotted civet, clouded leopard, and dhole, as well as the critically endangered reptiles Siamese crocodile and Southern river terrapin.
Protocol	VM0009: Methodology for Avoided Ecosystem Conversion, v3.0

Project Location	Cambodia, Southern Cardamom National Park and Tatai Wildlife Sanctuary
Project Timeline (BMO interprets this as the full crediting period of the project)	01/01/2015 - 31/12/2044
Project Start Date	January 1, 2015
Emissions Reduction Dates & Quantities Issued	The Emission Reduction Dates & Quantities Issued can be found on the registry's site for this Project: [ <a href="#">Project Description</a> ]
Project Type	REDD+
Emissions Type	Avoided emissions
Standards Met	Project vintage meets the standard of VM0009 as evidenced by registry listing and third party verification reports provided by Verra's site here [ <a href="#">Verra Project Summary</a> ]
Durability	More information about durability can be found on Verra's website here: [ <a href="#">Project Description</a> ]
Third Party Verifier	SCS Global Services
Volume of emissions removed or reduced annually	3,867,568 Tons [ <a href="#">Verra Project Summary</a> ]
Reversal Measures	More information about reversal measures can be found on Verra's website here: [ <a href="#">Project Description</a> ]
Source Data and calculation methods to reproduce / verify emissions reduction or removal credits issued	Refer to project documentation uploaded to the Registry. <a href="https://registry.verra.org/app/projectDetail/VCS/1748">https://registry.verra.org/app/projectDetail/VCS/1748</a>
