Project Description	The Rio Anapu-Pacaja REDD Carbon Credit Project in Portel, Para is protecting 165,707 hectares in a highly critical region of the Brazilian Amazon. The high levels of land grabbing, land conflict and instability in the region has allowed the project to strongly focus on bringing stability to all the areas that surround the project area by paying for and helping the local residents known as Riverine people to gain land tenure documents and eventually full freehold title deeds. The project also provided cook stoves to 50 families with the goal to help further families as carbon credit sales take place.
